

IC³ Certificate

WHAT IS IC³?

The Internet and Computing Core Certification (IC³) program is a global, validated, standards-based training and certification program for basic computing and Internet knowledge and skills. Successful completion of IC³ ensures you have the knowledge and skills required for basic use of computer hardware, software, networks, and the Internet. **IC³ is your gateway to advancement in education, employment, or other certification programs.**

WHY GET IC³ CERTIFIED?

You've spent time and money on training and education for a good reason: to advance with stability and upward potential. As a job candidate, the primary reason you would get hired is because you can prove you have the necessary skills to excel in the position. So how do you prove to others that you have the essential computing knowledge and skills to be successful? The answer is IC³ certification.

In today's digital world, almost all jobs and academic institutions require basic computing knowledge and skills. **IC³ certification will immediately identify you as someone who has what it takes to succeed as a student or employee.**

"IC³ fulfills our need for a standard that not only measures basic computing skills, but also provides students with a résumé-building credential recognized worldwide."

Dale Green, Director, Professional and Technical Education
South Kitsap School District

ANYONE CAN GET IC³ CERTIFIED

Everyone knows that computers and the Internet are pervasive in today's digital world. As a result, almost **anyone, young or old, could benefit from being IC³ certified.**

IMPROVE YOUR CHANCES

IC³ demonstrates to potential employers and academic institutions that you can use a computer effectively. While many may claim to have the skills, the ability to verify such skills is rare; giving those who are IC³ certified a major advantage in the job market. As a recognized academic credential, IC³ will also help those interested in higher education get accepted into leading universities, colleges, trade schools, or other institutions.

RECOGNIZED WORLDWIDE

IC³ is already in over 60 countries and more and more will be recognized by employers, Information & Communications Technology (ICT) professionals, academic professionals and other organizations as the standard in basic computing and Internet skills. IC³ is now recognized in the U.S. by the National Skill Standards Board (NSSB) as having met the highest professional and technical standards of quality, the first computer certification to do so.

EARN COLLEGE CREDIT

IC³ can help you achieve your higher education goals. Upon successful completion of IC³, you may receive college credit through participating colleges affiliated with the American Council on Education (ACE). IC³ has earned an ACE credit recommendation for college education so you can seek credit from the more than 1,800 accredited, degree-granting colleges, universities, and other education-related organizations that are members of ACE*.

VIEW AND SHARE YOUR CREDENTIALS ELECTRONICALLY

Certiport's Authenticated Digital Transcript service allows instant access to your credentials anytime. As an IC³ candidate, you can log on to the secure Certiport web site to verify your profile information, review your current exams and certifications, and authorize other viewers to review your accomplishments. Thus, you can easily present your certification transcript to employers, staffing agencies, academic institutions, and others.

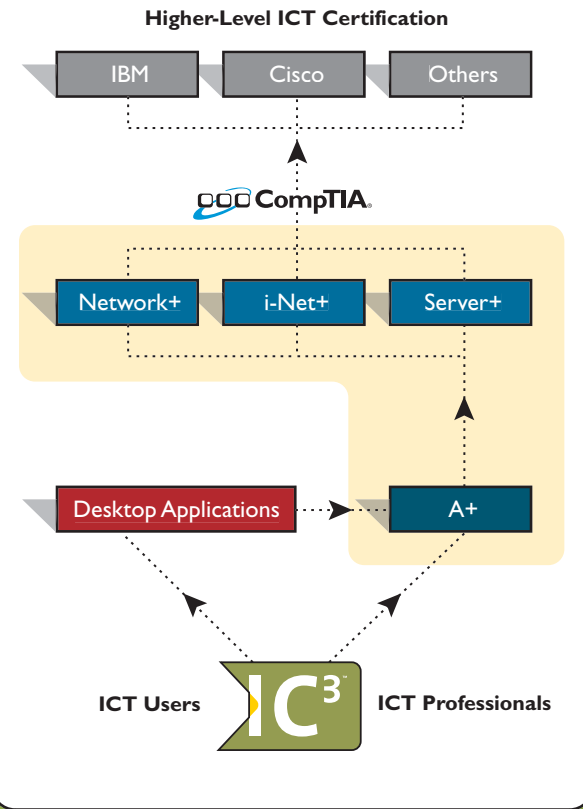

CERTIFICATION REQUIREMENTS

All you need to do to become IC³ certified is pass 3 exams that test your knowledge and skills through knowledge-based questions and performance-based tasks. Each exam takes less than an hour to complete and can be completed at any IC³ Authorized Center. For information on training materials and authorized centers, visit www.certiport.com/IC3.

*Colleges and universities accept ACE credit recommendations based on their own policies and requirements for each particular degree.

ICT STARTS WITH IC³

IC³ is the gateway to other certification programs and gives you the foundation you need to be successful in whatever career you choose.

Certification Roadmap

GET IC³ CERTIFIED TODAY

To become IC³ certified, contact an IC³ Authorized Center to schedule your training and exams. For more information, visit www.certiport.com/IC3 or call **1.800.572.9250** (Outside the U.S. call U.S. 801.847.3100).
